

# Sharpe Bros spread the word in Victoria

---

**Health, safety and the environment** continue to be a focus for those involved with the construction, maintenance and operation of asphalt and bituminous surfaced pavements. In Victoria at the Flexible Pavements Industry Conference, Michael Sharpe outlined to delegates the Sharpe Bros Multi Award Winning "Safety Bro" campaign. VicRoads Major Projects Division, presented an overview of best practices for construction safety developed in Victoria and WorkCover Victoria discussed what directions are likely to be taken shortly with new legislative changes in the OHS area. Delegates were encouraged to maximise industry improvement through 'learning from experiences' and the introduction of practical outcomes in the workplace.
